Additional information

Full text of classification: see section 16

SECTION 4: First aid measures

4.1. Description of first aid measures

General information

In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness give nothing by mouth, place in recovery position and seek medical advice.

In case of inhalation

Remove casualty to fresh air and keep warm and at rest. In case of irregular breathing or respiratory arrest provide artificial respiration.

Following skin contact

Take off immediately all contaminated clothing. After contact with skin, wash immediately with plenty of water and soap. Do not use solvents or thinners.

After eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Seek medical advice immediately.

Following ingestion

If swallowed, rinse mouth with water (only if the person is conscious). Seek medical advice immediately. Keep victim calm. Do NOT induce vomiting.

4.2. Most important symptoms and effects, both acute and delayed

In all cases of doubt, or when symptoms persist, seek medical advice.

4.3. **Indication of any immediate medical attention and special treatment needed** First Aid, decontamination, treatment of symptoms.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media

alcohol resistant foam, carbon dioxide, Powder, spray mist, (water)

Unsuitable extinguishing media

strong water jet

5.2. Special hazards arising from the substance or mixture

Dense black smoke occurs during fire. Inhaling hazardous decomposing products can cause serious health damage.

5.3. Advice for firefighters

Provide a conveniently located respiratory protective device. Cool closed containers that are near the source of the fire. Do not allow water used to extinguish fire to enter drains, ground or waterways.

SECTION 6: Accidental release measures

Article No.: Print date: Version:	XG931A8AAM10 11.01.2024 1.0001	[Z] ZowoTec® 263 Revision date: 11.01.2024 Issue date: 03.01.2024	EN Page 4 / 13	Coating Systems
Vereien.	1.0001	10000 0010 00.01.2021	Tugo I, Io	

6.1. **Personal precautions, protective equipment and emergency procedures** Keep away from sources of ignition. Ventilate affected area. Do not breathe vapours.

6.2. Environmental precautions

Do not allow to enter into surface water or drains. If the product contaminates lakes, rivers or sewages, inform competent authorities in accordance with local regulations.

Z ZOBEL

6.3. Methods and material for containment and cleaning up

Isolate leaked material using non-flammable absorption agent (e.g. sand, earth, vermiculit, diatomaceous earth) and collect it for disposal in appropriate containers in accordance with the local regulations (see section 13). Clean using cleansing agents. Do not use solvents.

6.4. Reference to other sections

Observe protective provisions (see section 7 and 8).

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Advices on safe handling

Avoid formation of flammable and explosive vapour concentrations in the air and exceeding the exposure limit values. Only use the material in places where open light, fire and other flammable sources can be kept away. Electrical equipment must be protected meeting the accepted standard. Keep away from heat sources, sparks and open flames. Use only spark proof tools. Avoid contact with skin, eyes and clothes. Do not inhale dusts, particulates and spray mist when using this preparation. Avoid respiration of swarf. When using do not eat, drink or smoke. Personal protection equipment: refer to section 8. Do not empty containers with pressure - no pressure vessel! Always keep in containers that correspond to the material of the original container. Follow the legal protection and safety regulations.

Further information

Vapours are heavier than air. Vapours form explosive mixtures with air.

7.2. Conditions for safe storage, including any incompatibilities

Requirements for storage rooms and vessels

Storage in accordance with the Ordinance on Industrial Safety and Health (BetrSiVO). Keep container tightly closed. Do not empty containers with pressure - no pressure vessel! Smoking is forbidden. Access only for authorised persons. Store carefully closed containers upright to prevent any leaks. Soils have to conform to the "Guidelines for avoidance of ignition hazards due to electrostatic charges (TRGS 727)".

Hints on joint storage

Keep away from strongly acidic and alkaline materials as well as oxidizers.

Further information on storage conditions

Take care of instructions on label. Store in a well-ventilated and dry room at temperatures between 15 °C and 25 °C. Protect from heat and direct sunlight.

Due to the content of organic solvents in the preparation:

Protect from heat and direct sunlight. Keep container tightly closed. Remove all sources of ignition. Smoking is forbidden. Access only for authorised persons. Store carefully closed containers upright to prevent any leaks.

7.3. Specific end use(s)

Observe technical data sheet. Observe instructions for use.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Occupational exposure limit values:

(2-methoxymethylethoxy)propanol EC No. 252-104-2 / CAS No. 34590-94-8

WEL, TWA: 308 mg/m3; 50 ppm Remark: (may be absorbed through the skin)

2-butoxvethanol

Index No. 603-014-00-0 / EC No. 203-905-0 / CAS No. 111-76-2

WEL, TWA: 123 mg/m3; 25 ppm

WEL, STEL: 246 mg/m3; 50 ppm

Remark: (may be absorbed through the skin)

BMGV, TWA: 240 mmol/mol creatinine

Remark: Butoxyacetic acid; urine; end of exposure or end of shift

PNEC sewage treatment plant (STP): 4168 mg/L

8.2. Exposure controls

Provide good ventilation. This can be achieved with local or room suction. If this should not be sufficient to keep aerosol and solvent vapour concentration below the exposure limit values, a suitable respiratory protection must be used.

Personal protection equipment

Respiratory protection

If concentration of solvents is beyond the occupational exposure limit values, approved and suitable respiratory protection must be used. Observe the wear time limits according GefStoffV in combination with the rules for using respiratory protection apparatus (BGR 190). Use only respiratory protection equipment with CE-symbol including four digit test number.

Hand protection

For prolonged or repeated handling the following glove material must be used: Butyl caoutchouc (butyl rubber)

Thickness of the glove material > 0,4 mm ; Breakthrough time: > 480 min.

Observe the instructions and details for use, storage, maintenance and replacement provided by the protective glove manufacturer. Penetration time of glove material depending on intensity and duration of exposure to skin. Recommended glove articles EN ISO 374

Barrier creams can help protecting exposed skin areas. In no case should they be used after contact.

Eye/face protection

Wear closely fitting protective glasses in case of splashes.

Body protection

Wear antistatic clothing of natural fibers (cotton) or heat resistant synthetic fibers.

Protective measures

After contact clean skin thoroughly with water and soap or use appropriate cleanser.

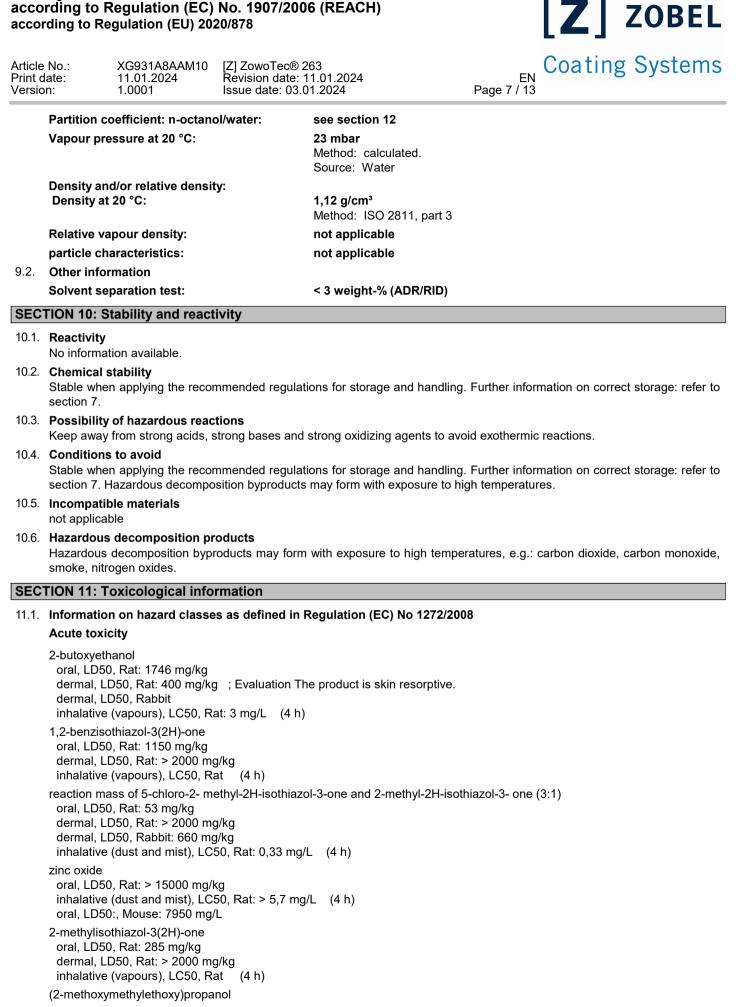

Environmental exposure controls

Do not allow to enter into surface water or drains. See section 7. No additional measures necessary.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

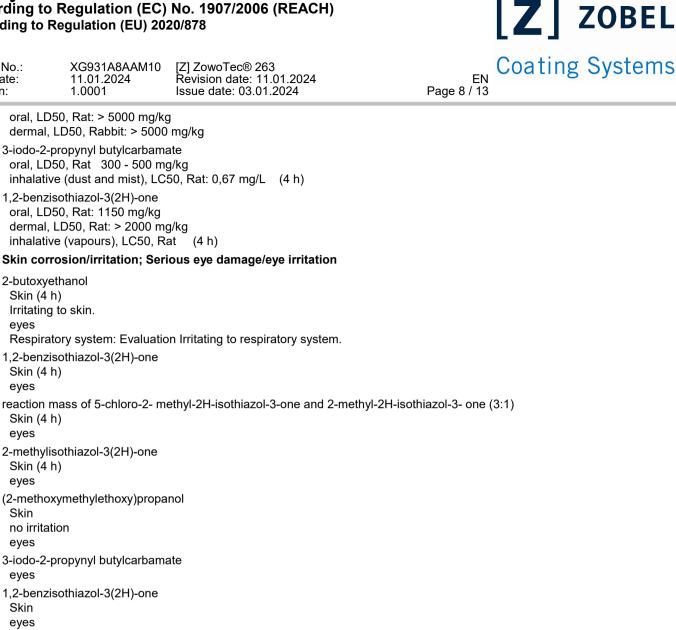

Physical state: Colour:	Liquid refer to chapter 1.
Odour:	characteristic
Odour threshold:	not applicable
Melting point/freezing point:	not applicable
Initial boiling point and boiling range:	100 °C Source: Water
Flammability:	not applicable
Lower and upper explosion limit: Lower explosion limit: Upper explosion limit:	1,1 Vol-% 14 Vol-% Source: (2-methoxymethylethoxy)propanol
Flash point:	not applicable
Auto-ignition temperature:	207 °C Source: (2-methoxymethylethoxy)propanol
Decomposition temperature:	not applicable
pH at 20 °C:	8,7 - 9,3 / 100,0 weight-% Method: EN 1262
Cinematic viscosity (40°C):	< 20 mm²/s
Viscosity at 20 °C:	11 s 4 mm Method: DIN 53211
Solubility(ies): Water solubility at 20 °C:	partially soluble

CMR effects (carcinogenicity, mutagenicity and toxicity for reproduction)

Based on available data, the classification criteria are not met.

STOT-single exposure; STOT-repeated exposure

(2-methoxymethylethoxy)propanol Evaluation No data available

3-iodo-2-propynyl butylcarbamate Specific target organ toxicity (single exposure), Irritation Specific target organ toxicity (repeated exposure)

Aspiration hazard

(2-methoxymethylethoxy)propanol Aspiration hazard; Evaluation Represents no obvious danger of aspiration due to its physical properties

Article No.: Print date:	XG931A8AAM10 11.01.2024	[Z] ZowoTec® 263 Revision date: 11.01.2024	EN	Coating Systems
Version:	1.0001	Issue date: 03.01.2024	Page 9 / 13	

Practical experience/human evidence

Inhaling of solvent components above the MWC-value can lead to health damage, e.g. irritation of the mucous membrane and respiratory organs, as well as damage to the liver, kidneys and the central nerve system. Indications for this are: headache, dizziness, fatigue, amyosthenia, drowsiness, in serious cases: unconsciousness. Solvents may cause some of the aforementioned effects through skin resorption. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and/or absorption through skin. Splashing may cause eye irritation and reversible damage.

ZOBEL

Overall assessment on CMR properties

The ingredients in this mixture do not meet the criteria for classification as CMR category 1A or 1B according to CLP.

11.2. Information on other hazards

Endocrine disrupting properties

The mixture contains >= 0.1% of substances that have endocrine disrupting properties. See SECTION 3 of this safety data sheet.

SECTION 12: Ecological information

Classification according to Regulation (EC) No 1272/2008 [CLP] There is no information available on the preparation itself . Do not allow to enter into surface water or drains.

12.1. Toxicity

2-butoxyethanol

Fish toxicity, LC50, Oncorhynchus mykiss (Rainbow trout): 1474 mg/L (96 h) Daphnia toxicity, EC50, Daphnia magna (Big water flea): 1550 mg/L (48 h) Method: OECD 202 Algae toxicity, ErC50, Pseudokirchneriella subcapitata: 1840 mg/L (72 h) Method: OECD 201

Air transport (ICAO-TI / IATA-DGR)

in packages <= 5 litres

Not restricted, as per Special Provision A197

Page 12 / 13

14.7. Maritime transport in bulk according to IMO instruments

No transport as bulk according IBC - Code.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU	legis	lation

Regulation (EU) No. 528/2012 on biocides biocidal product biocide, active substance	
tebuconazole (ISO)	2,5 g/kg
3-iodo-2-propynyl butylcarbamate	9 g/kg
1,2-benzisothiazol-3(2H)-one	0,211 g/kg
N-didecyl-N-dipolyethoxyammonium borate / didecyl polyoxethylammonium borate (polymer betaine)	0,5 g/kg
Biocide authorizations	
	BAuA-Nr.: N-90813

Use

Main group 2: Preservatives Product-type 8: Wood preservatives

Directive 2012/18/EU on the control of major-accident hazards involving dangerous substances [Seveso-III-Directive] Category: E2 Hazardous to the aquatic environment in Category Chronic 2

Quantity 1: 200 t / Quantity 2: 500 t

Directive 2010/75/EU on industrial emissions [Industrial Emissions Directive]

VOC-value (in g/L) ISO 11890-2: 55 VOC-value (in g/L) ASTM D2369: 278

National regulations

Restrictions of occupation

Observe restrictions to employment for juveniles according to the 'juvenile work protection guideline' (94/33/EC).

Other information:

Switzerland:

Volatile organic compounds (VOC) content in percent by weight: 4

Denmark:

PR-No.:

MAL code (MAL code in mixture):

15.2. Chemical Safety Assessment

Chemical safety assessments for substances in this mixture were not carried out.

SECTION 16: Other information

Full text of classification in section 3:				
Aquatic Acute 1 / H400	Hazardous to the aquatic environment	Very toxic to aquatic organisms.		
Aquatic Chronic 1 / H410	Hazardous to the aquatic environment	Very toxic to aquatic life with long lasting effects.		
Acute Tox. 4 / H302	Acute toxicity (oral)	Harmful if swallowed.		
Acute Tox. 3 / H331	Acute toxicity (inhalative)	Toxic if inhaled.		
Eye Dam. 1 / H318	Serious eye damage/eye irritation	Causes serious eye damage.		
Skin Sens. 1 / H317	Respiratory or skin sensitisation	May cause an allergic skin reaction.		
STOT RE 1 / H372	STOT-repeated exposure	Causes damage to organs (or state all organs affected, if known) through prolonged or repeated exposure (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard).		
Skin Irrit. 2 / H315 Aquatic Chronic 2 / H411 Repr. 2 / H361	Skin corrosion/irritation Hazardous to the aquatic environment Reproductive toxicity	Causes skin irritation. Toxic to aquatic life with long lasting effects. Suspected of damaging the unborn child.

Eye Irrit	t. 2 / H319	Serious eye damage/eye irritation	Causes serious eye irritation.	
•	ox. 2 / H330	Acute toxicity (inhalative)	Fatal if inhaled.	
Acute T	ox. 3 / H311	Acute toxicity (dermal)	Toxic in contact with skin.	
Acute T	ox. 3 / H301	Acute toxicity (oral)	Toxic if swallowed.	
Skin Co	orr. 1B / H314	Skin corrosion/irritation	Causes severe skin burns and eye damage.	
	ens. 1A / H317	Respiratory or skin sensitisation	May cause an allergic skin reaction.	
	ox. 2 / H310	Acute toxicity (dermal)	Fatal in contact with skin.	
Skin Co	orr. 1C / H314	Skin corrosion/irritation	Causes severe skin burns and eye damage.	
Classif	ication procedure			
Classifi	cation for mixtures an	d used evaluation method according to re	gulation (EC) No 1272/2008 [CLP]	
Skin Se	ens. 1	Respiratory or skin sensitisation	Calculation method.	
Aquatic	Chronic 2	Hazardous to the aquatic environment	Calculation method.

Further information

Classification according to Regulation (EC) No 1272/2008 [CLP]

The information supplied on this safety data sheet complies with our current level of knowledge as well as with national and EU regulations. Without written approval, the product must not be used for purposes different from those mentioned in section 1. It is always the user's duty to take any necessary measures for meeting the requirements laid down by local rules and regulations. The details in this safety data sheet describe the safety requirements of our product and are not to be regarded as guaranteed attributes of the product.
